Professional Summary

Aspiring network and cybersecurity professional currently completing a BSc in Computer Systems and Security. Passionate about telecommunications, network infrastructure, and regulatory technology, with a strong foundation in Linux systems and data analysis.

Education**Malawi University of Science and Technology (MUST)**

Bachelor of Science in Computer Systems and Security

Expected Graduation: July 2026

Certifications

- Cisco Networking Academy – Data Science Essentials
- Cisco Networking Academy – Linux Essentials

Technical Skills

- Computer networking (LAN/WAN concepts)
- Linux system administration
- Network security fundamentals
- Programming: Python, C++, Java, JavaScript, PHP
- Basic data science and analysis

Projects**Secure SIM Swapping System (Final Academic Project)**

- Co-developed a secure SIM swap system aimed at reducing unauthorized SIM replacement and identity fraud. Applied principles of system security and performance optimization.
- Contributed to system architecture design, focusing on secure data handling and user verification workflows
- Applied cybersecurity principles to protect sensitive subscriber information during SIM swap processes

Student Accommodation Finder (palevel.com)

- Designed and implemented the project database, ensuring efficient data storage, retrieval, and scalability
- Developed the database schema, including tables for users, landlords, properties, bookings, and payments
- Ensured data validation and security considerations in handling user and property information

Tools & Platforms

- Kali Linux
- Packet Tracer
- Wireshark

- VS Code

Key Competencies

- Problem solving
- Analytical thinking
- Attention to detail
- Communication skills

Interests

- Financial technology (FinTech)
- Cybersecurity in banking systems
- Data-driven decision making
